DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 4-21, and 23-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cane et al., US Patent number 5,940,507 in view of Padgett et al., US Patent number 6,167,518.

With regard to claims 1, 2, 5, 12, 20, 21, 24, and 32, as best understood, Cane discloses a method for managing access to data in a processing system (column 1 lines 17-19) including, receiving a request for first key (column 3 lines 59-61) encrypted data, determining whether the requestor is trusted, decrypting a copy of the data (column 4 lines 17-19) with a second key (column 4 lines 23-26) and sending the decrypted data (column 4 lines 16-37). Cane discloses using additional security (column 2 lines 32-33), but does not specifically mention identifying the client by checking his identity against a database. Padgett discloses that a key store can be public, as in Cane, but can also be restricted through authentication (column 3 lines 9-15). It would have been obvious for one of ordinary skill in the art to authenticate the client in Cane, for Cane's stated motivation of adding additional security.

With regard to claims 4 and 23, Cane discloses that one of the data items is a key, decrypted by the server key (column 16-26).

With regard to claims 6, 7, 13, 14, 25, and 26, Cane discloses the data is indexed (column 4 lines 37-41).

With regard to claims 8-10 and 27-29, Cane discloses items added to the archive are encrypted (column 3 lines 45-59).

With regard to claims 11, 30, and 31, Cane discloses sending the key with the data (column 4 lines 29-31).

With regard to claims 15-19, the examiner takes official notice that processing systems frequently have multiple busses and processors and Ethernet adapters. Cane discloses a processing system, but does not discuss the processors, busses or adapters. It would have been obvious for one of ordinary skill in the art to use Cane's secure archiving in any such system for the disclosed motivation of securing privacy of data (column 2 lines 11-14).

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2134

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
